Sony Booth #2923

Area 1 – New E-Series 1080p HD IP Cameras
 Be one of the first to see five new 1080p HD IP camera additions to our popular E-series line-up – entry-level models that combine high picture quality and a robust feature-set at a cost-effective price.

Area 2 – New V-Series HD IP Cameras
 Sony's flagship line incorporating the latest technologies, now include two new models in fixed, dome and bullet styles. See their advanced imaging and analytic features in action.

Area 3 – New X-Series HD IP Cameras
 We've enhanced our discreet X-Series line-up to include five new network cameras ranging from fixed to dome to vandal resistant models, available in 720p HD and 1080p HD. See us demonstrate how these X-Series cameras bundle with the NSR-S10 network server or RSM Lite software for instant Plug & Play solutions.

Area 4 – New 4-Channel Stand-alone NVR
 Check out our 4-Channel stand-alone NVR and RSM Lite free-software for small installations as we demonstrate how easy it is to set up and configure, and how quickly you can start monitoring and recording.

Area 5 – Intelligent IR Demonstration
 Join us for a "night vision" experience as we demonstrate how Sony cameras' built-in IR (infrared) illuminator technology assists in capturing objects in complete darkness (0 lx) without being noticed by the human eye.

Area 6 – Sony Security Systems
 Equipped with a vast product range of IP cameras, encoders, recorders, monitors and software, advanced image technologies and value-add features, it's no wonder Sony can offer scalable solutions for virtually every security application and budget.

Area 7 – HD Picture Quality Experience
 See the difference that HD can make in your surveillance. Demo our network HD cameras both of 720p HD and 1080p HD at full frame rate, with full complement of HD video security technologies, all of which provide high quality images in challenging security environments.

Area 8 – View-DR™ Ultra Wide Dynamic Technology
 See for yourself how Sony's View-DR™ Ultra Wide Dynamic technology helps capture objects clearly in low light, backlit or night time environments.

Area 9 – Sony/VidSys Enterprise Solutions
 Let us introduce you to an exciting new alliance, as we demonstrate how the VidSys PSIM (Physical Security Information Management) Software integrates with the Sony NSR-1000 Series Network Surveillance Servers, and HD Cameras, to give joint customers the ability to streamline their real time identification of and response to situations.

Area 10 – XI's Wide Area Monitoring System
 Learn how Sony's XI's system is the perfect solution for monitoring vast areas such as ports, power plants, dams, airports, borders and more for potentially threatening activities 24/7/365.

Area 11 – New Analog Cameras and Encoders
 Get in touch with your analog side, as we debut three new analog cameras to round out our camera line-up. You'll be amazed by how much our video encoders can dramatically improve the picture quality of your analog legacy system.

Area 12 – DEPA Advanced with Voice Alert
 Discover how DEPA™ Advanced technology provides intelligent video and audio analytics, such as object and motion detection, tamper alarm, etc. that trigger an audio alarm based on user defined rules.
