

SxS Memory Card / Hardware Compatibility Chart

September 2011

IMPORTANT INFORMATION

- SxS® memory cards are shipped from the factory in the FAT format.
- Install the latest SxS device driver when using SxS memory cards with Windows PC/Mac. For details visit our website at www.sony.com/promedia.
- For XDCAM®/XDCAM EX™ device firmware updates, please check the website of each product.
- When using SxS memory card in UDF file system with PMW-500 or PDW-HR1 with PDBK-MK, it should be formatted by UDF format in advance. In case any contents have been recorded in the SxS memory card, please make a backup copy before formatting to the UDF format. The same thing is needed when using in FAT file system from the UDF formatted SxS memory card.

HARDWARE	SxS-1			SxS PRO			
	SBS-32G1*1	SBS-32G1A	SBS-64G1A	SBP-8	SBP-16	SBP-32	SBP-64A
PMW-EX1	✓ Requires firmware update v1.20 or higher for hardware.	✓ Requires firmware update v1.25 or higher for hardware.		✓		✓ Requires firmware update v1.20 or higher for hardware.	✓ Requires firmware update v1.25 or higher for hardware.

SBAC-US10	✓*4	✓*4		✓*4		✓*4	✓*4

*1. Media firmware update may be required. For detailed information, please refer to www.sony.com/promedia.

*2. To record content onto the SxS memory card in MXF mode, the SxS memory card needs to be formatted to UDF format before recording. Please make a backup copy of data on SxS memory card before formatting to UDF format.

*3. "UDF formatted" SxS memory cards cannot be used.

*4. To use "UDF formatted" SxS memory cards with Windows PC/Mac, SxS UDF Driver needs to be installed. For detailed information, please check the website of each product at <http://pro.sony.com/bbsc/ssr/micro-xdcam/>.

*5. When copying the content from the SxS memory card to internal storage, FAT/UDF is automatically detected.
