

HDVF-C35W

SONY HD ELECTRONIC VIEWFINDER

Multi-format HD Color LCD Viewfinder

The HDVF-C35W, 3.5-inch (*) type HD LCD color viewfinder provides an optimum level of visual information via a full-color TFT-LCD device. Employing a unique detachable eye-piece construction, camera operators can clearly view images from various positions and angles. In addition, this LCD display offers a wide viewing angle, offering operational convenience when a number of people want to view the same picture at the same time. What's more, by incorporating a spherical lens in its eye-piece, aberration at each corner of the viewfinder is reduced for easy focusing.

For use with the HDC1400/1500/1550/F950, F23, and HDW-F900R/790/790P/730S
